

The water our body needs

ANDROMEDA

The Bio-dynamiser and Harmonizer

The Andromeda Biodynamiser allows you to Bio-dynamise and inform Light & Sound® water already purified.

Stylish and lightweight, it also broadcasts a radiation beneficial to the harmony of the room in which it is installed. Easy to install, a wall plug or electrical outlet is all that is needed.

ANDROMEDA MEETS A VARIETY OF NEEDS

Ideal for those who are already equipped with a water purifier and want to go further with the quality of their water. It is the ideal complimentary equipment.

Ideal for those who drink bottled water and wish to drink bio-dynamised water.

Perfect for travellers who wish to pursue their bio-dynamised daily drinking water consumption.

With unusually high frequency vibrations, it makes it very easily assimilated by our cells. The body spends less energy for all metabolic functions.

It helps cellular hydration and preserve our full well being, health and vitality potential.

1. Power Supply 12V
2. Input 12 V
3. Crocodile clip for dynamisation Electrode
4. Memory card with music
5. Copper Electrode
6. Dynamisation out
7. Silver Electrode
8. Carbon Electrode
9. Tester to indicate dynamisation
10. Sound Receiver
11. Glass and gold base
12. LED Radiating Light & Sound

1 Bio-dynamisation

Bio-dynamisation integrates into the water high frequency waves that are created by an oscillator and captured in a beeswax condenser. Two silver electrodes transmit these structuring energies. The first is placed in the bio filter and ensures a continuous dynamization of the water. The second electrode is spiral, and is immersed in the tank. Here it creates a constant process of dissemination of these waves – releasing silver ions into the water of the fountain. Bio-dynamisation is the transference of subtle energies found in high frequency waves permeated into water. The same waves that support harmony in universal life.

2 Information Light & Sound®

Thanks to the innovative Aqua Dyn Auroville technology, water is constantly bathed in a light field carrying sound waves within the tank. A selected and recorded piece of music (Bach, Mozart, Beethoven...) is broadcast loop, carried by infrared or light radiation. These sound waves optimize the vibratory rate of the water and thus increase its living properties.

Information

3 Trace Elements Liberation

During bio-dynamisation, the electrode used loses tiny part of its weight in the form of trace elements. In this "nascent ion form", trace elements become immediately assimilated by our body.

AQUA DYN AUROVILLE

R&D Center: an asset for health and well being

Aqua Dyn Auroville was started in 1994 in Auroville, the universal township for human unity. Aqua Dyn is a Research & Development Center on the benefits of pure and living water founder of bio-dynamisation and Light & Sound® Information . Aqua Dyn's fountains give a water biocompatible with our body water, our "biological water".
